

EDSS Project Bulletin

Beenleigh Police Station
Builder: Glenzeil Pty Ltd
Contract Period: 52
Contract value: \$1,720,000.00

Electrical Data & Security Services

Electrical Data & Security Services are proud to announce the 2012 completion of the three-stage upgrade to the Beenleigh Police Station which commenced in early 2011.

The first stage of this exciting project involved the external works including a car park upgrade, a new entry via Kent Street and provisions for a new generator.

The second stage included the construction of a three-storey building to house the new Communications Centre and purpose-built major incident room, located on the southern end of the station.

The final stage of the project was the refurbishment of the existing Police Station which included the electrical, data, security and electronics throughout the entire building.

There were many obstacles that we at EDSS faced throughout this project, one of which being that the Police Station is operational 24 hours a day 7 days a week. This meant planning the project out into multiple stages and also ensuring that we had a great deal of communication with the client at all times.

Electrical Data & Security Services are extremely pleased to have been part of the Beenleigh Police Station upgrade/refurbishment and we take pride in knowing that we played a vital part in providing this much needed facility to the Queensland Police Service.
