

EDSS Project Bulletin

Genesis Administration Building
Builder: ICD Group
Contract Period: 32Weeks
Contract value: \$420,000.00

Project Details

Completing the new Administration Building at Genesis Christian College on time and to budget was a major milestone for EDSS.

The new building comprises two levels that house the administration functions that support over 1000 students that attend the college. Carolyn Male, the State Member for Pine Rivers officially opened the new building on 18th May 2009 and proudly proclaimed it as "another milestone in the evolution of Genesis Christian College."

EDSS helped deliver the successful completion of the project by ensuring that all electrical and communication infrastructure for the building was completed to specifications.

Our experience in working at education facilities throughout Queensland ensured that there were minimal interruptions to the students attending the college whilst work was progressing.

Our ASNZS 4801 Safety Management System also ensured that students were not placed at any risk during the electrical and communication works.
